**HEALTH, WELLNESS AND CHIROPRACTIC CARE**

The human body is designed to be healthy. The primary system in the body which coordinates health is the NERVE SYSTEM. The vertebrae, (bones of the spine) surround and protect the delicate NERVE SYSTEM.

Physical, emotional and chemical stresses, common to our contemporary lifestyles, can result in misalignment to the spinal column as well as damage to the nerve system. The result is a condition called Vertebral Subluxation. (Please see booklet attached). The Chiropractic Exam/evaluation determines if your spine shows signs of the Vertebral Subluxation process.

Please review and indicate your history of “stresses” (below) so that we can assess their relationship to your present health status and examination findings. We will discuss this during the consultation.
